Letter of Recommendation for Mr. Ambaprasad Hegde

To Whom It May Concern,

It is my profound pleasure to recommend Mr. Ambaprasad Hegde, with whom I have worked closely over an extended period at BMW Group in Munich.

Mr. Hegde initially joined our Virtual Commissioning and Automation department as an intern in 2024. During this time, he quickly distinguished himself through his technical expertise and his ability to independently solve complex engineering challenges. Based on his strong performance, he continued his work with us through his Master's thesis and subsequently joined our team in a full-time role, where took the lead on test automation.

Throughout this journey, Mr. Hegde made significant contributions to the digitalization of production engineering processes. In particular, he played an important role in automating testing workflows for both virtual and physical PLC environments. He consistently demonstrated the ability to understand complex requirements, identify opportunities for improvement, and translate ideas into practical software solutions. What impressed me most was his ability to take ownership of challenging topics and deliver results with minimal supervision. Rather than simply executing assigned tasks, he actively drove technical solutions forward and assumed responsibility for strategically relevant work packages. Over time, he developed from an intern into a trusted engineer who could be relied upon for important technical decisions and demanding projects across the world.

Mr. Hegde possesses strong expertise in software engineering, automation technologies, and Artificial Intelligence. He approaches complex problems in a structured manner and consistently delivers high-quality results. In addition, he communicates effectively with both technical and non-technical stakeholders and collaborates well across interdisciplinary teams.

Having observed his development from intern to full-time engineer, I can confidently say that Mr. Hegde has the capability to succeed in demanding technical and leadership-oriented roles. He has consistently shown initiative, sound judgment, and the ability to take responsibility beyond what is typically expected at his career stage.

I recommend Mr. Hegde without reservation and am confident that he will make a significant contribution wherever he takes on his next challenge.

Should you require any further information, please do not hesitate to contact me.

Yours sincerely,

Alexander Kuhn
